

Pneumatic benchtop dispenser for glues & pastes

Adhesives Glues Pastes Silicones Solvents Paints Grease Epoxies Primers

The ADL100 is a cost-effective analog timed air powered dispenser. It's light weight and compact size makes this the ideal bench top solution for all your gluing, solder paste application and most other fluids. Its simplified construction and operation makes it an ideal replacement to squeeze tubes, bottles, brushes and syringes. The ADL100 comes with two modes; manual/pre-set timer.

By setting the timer, repeat deposits can be made from small dots to big shots. Press the steady mode and it will make continuous beads.

Features vacuum suck-back to stop drips of watery liquids. Supplied complete with a syringe barrel assortment, needle tip kit assortment, adapter assembly, foot switch, power cord and user guide. It is CE certified with a 220V power adapter.

Covered by a 1 year warranty. This classic designed benchtop dispenser is simple to use and operate and we offer full technical support for setting up.

This compact dispenser sits on the bench and uses an air input from any compressor or factory mains supply. Supplied with airline hose and fittings kit to make connection easy. Ready to use out of the box.
